PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in web, mobile, data automation, and network-based systems. Experienced in building integrated platforms using Python, Flutter, Firebase, WordPress, and API integrations. Developed data analysis and reporting solutions that transform CSV/XLSX files into ready-to-use Word reports for researchers and students, as well as a smart fingerprint attendance system with real-time cloud synchronization. Fast learner with strong problem-solving skills and a practical understanding of product development from code to user delivery.

TECHNICAL SKILLS

- Programming & Frameworks: Python, JavaScript, Dart, Flutter, Python Automation
- Web & Databases: HTML, CSS, WordPress, Firebase Realtime Database, Firebase Authentication
- Data Automation & Reporting: CSV/XLSX processing, automated statistical analysis, Word report generation, data cleaning, tables and report formatting
- Systems & Integrations: Network engineering, server/hosting setup, API integration, e-payment gateways, MLKit / Face Detection
- Supporting Skills: UI/UX basics, digital marketing, Photoshop, Canva

PROFESSIONAL EXPERIENCE

Freelance Software Engineer & Web/Mobile Developer | Jan 2018 - Present

- Develop web and mobile solutions for academic, administrative, and business use cases using Python, Flutter, Firebase, WordPress, and web technologies.
- Designed and built web portals and business websites, including waselwart.com and kulaistechpower.com.
- Automated repetitive administrative and data-processing workflows to reduce manual effort and improve report readiness.
- Set up and managed hosting, servers, and network environments to support stable system operation and secure data flow.
- Supported technical marketing activities for digital products, including campaign management and customer engagement improvement.

IT Trainee | Al Mottahida Insurance Company | May 2023 - Jul 2023

- Supported the maintenance of IT infrastructure, network systems, and daily technical operations.
- Assisted with advanced technical support, software troubleshooting, and issue resolution to maintain business continuity.

KEY PROJECTS

ONME Data Analysis & Research Reporting Platform

- The AI data analytics platform for the technology company [ONME.TECH](#) - [ONME Analysis](#) | has been developed with continuous technical support provided.
- Developed an integrated platform that analyzes CSV/XLSX files and generates a complete Word report for researchers and students.
- Automates data preparation, statistical analysis, table generation, written outputs, and final report formatting.
- Reduces manual report preparation from hours to approximately one minute depending on file size and analysis requirements.
- Designed to help non-technical academic users convert raw survey or research data into structured, ready-to-use outputs.

Smart Fingerprint Attendance Management System

- Designed and developed a [fingerprint-based attendance](#) system for employee attendance and departure tracking.
- Used Firebase for real-time data synchronization, authentication, and cloud-based record access.
- Improved attendance tracking accuracy and reduced dependency on manual HR follow-up.

EDUCATION & CERTIFICATIONS

- B.Sc. in Network Engineering & Information Technology - University of Aden, Faculty of Computer and Information Technology (2019 - 2023)
- Cybersecurity Certificate - Al Rayyan University, Online (Nov 2021 - Dec 2021)
- Mobile Programming Course - American Harvard Institute, Aden (Oct 2018 - Dec 2018)
- Robot Teacher Preparation (3Ev) - Kuwait Training Center, Aden (Mar 2022)
